DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to the following patentably distinct species of the claimed invention: Species 1 is a family of at least three separate keyboards; Species 2 is a multimode electronic keyboard with alternative option means to be used according to operator preference allowing at least two alternative options for conveniently touch-typing the identical characters; Species 3 is an electronic keyboard with an alphanumeric section including a left hand group of at least five touch-typing columns of graphic character keys laterally symmetrical to a right hand group; Species 4 is an electronic keyboard with an alphanumeric section with a plurality of keys arranged in rows and columns, having a symmetrical cross-arrangement for four cursor control keys; Species 5 is a keyboard having invisible characters and a graphic character capacity of at least 82 or 96 characters; Species 6 is an electronic keyboard having at least two shift keys, said shift keys located for convenient operation by an index finger with the typist's hands in position for touch-typing, to facilitate one-handed shift-character operations; Species 7 is an electronic keyboard with at least one shift key having combined functions, said functions being differentiated electronically in response to distinctive key operating procedures; Species 8 is an electronic keyboard with an alphanumeric section arranged in rows having at least two shift functions; Species 9 is a touch-typing method.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Art Unit: 2854

2. Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

3. A telephone call was made to John Parkinson on July 17, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
